

HUMAN-CENTERED SECURITY

M. ANGELA SASSE

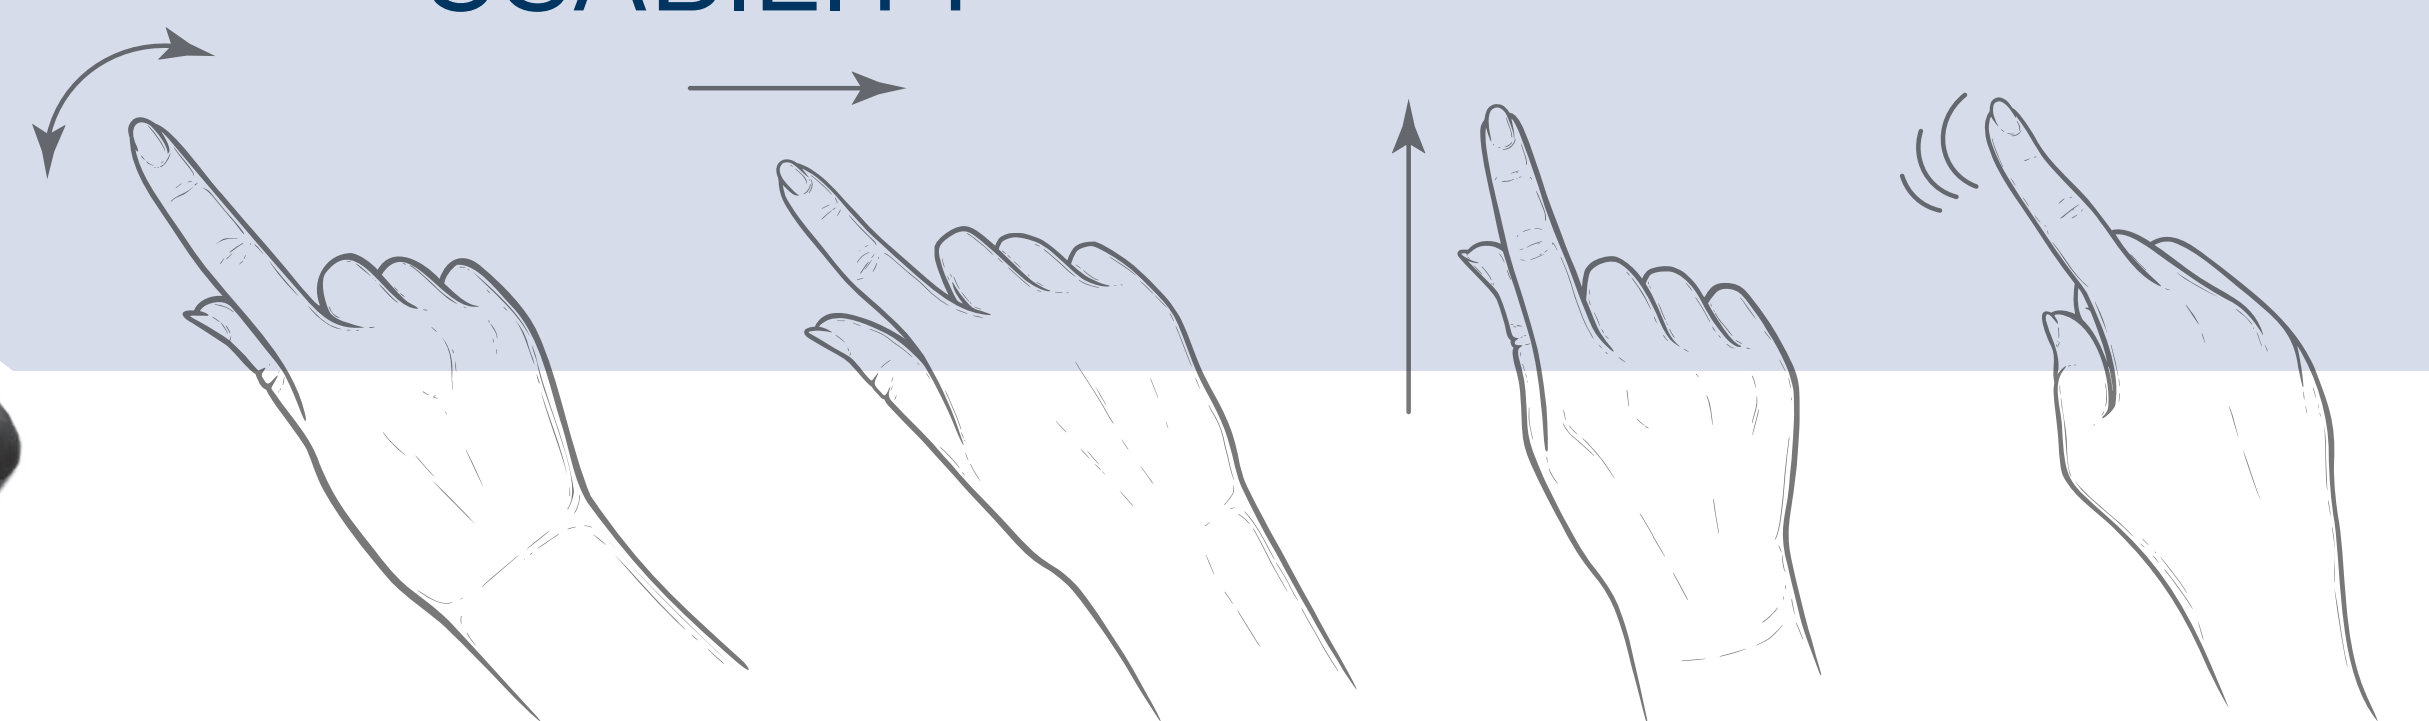

SECURITY

PRIVACY MECHANISMS

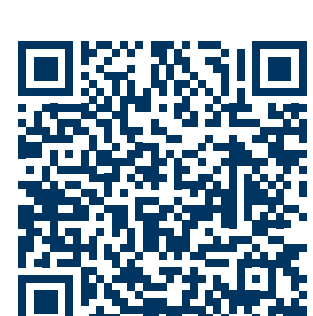

USABILITY

WOMEN IN IT SECURITY

M. Angela Sasse is a Professor for Human-Centered Security at Ruhr-Universität Bochum (RUB), and PI within the Cluster of Excellence CASA. She is a Speaker of CASA, and Leader of Research Hub D "Usability".

Her research explains human behavior in relation to security and privacy and how knowledge from psychology and economics can be applied to build security and privacy protection that meets the needs of individuals, organizations and society. She studied and received her PhD in Industrial and Organizational Psychology. Before coming to RUB, she founded and directed the Research Institute for Sociotechnical Cyber Security (RISCS) in the UK.
